

We Know Who You Think Of When You Think Microwave Instruments.

And We're About To Change Your Mind.

You think that dependable, high-quality microwave instruments are often cost-prohibitive. We understand. So AR Europe works hard to bring you equipment that's high-quality and cost-effective. That's exactly what we found at CETC 41. Their outstanding RF Analysers, Generators and more will completely change your mind about your choice of vendor for microwave instruments.

Introducing CETC 41

CETC 41 produces a range of products that complement the equipment already being offered by AR Europe. They create instruments with incomparable price-performance ratio; excellent testing and receiving performance; and easy, convenient operation.

AR Europe is proud to offer these exceptional products to our customers throughout Europe. Products include:

- Cable and Antenna Analysers
- Spectrum Analysers
- Analog and Vector Signal Generators
- Vector Network Analysers
- Vector Signal Analysers

In addition to being the sole European distribution partner of CETC 41, AR Europe will also provide expert service and support. For more information, please call +353 61 504300 or visit www.ar-europe.ie/cetc-41.
