

If You Can't Find The Power You Need Here, It Doesn't Exist.

Traveling Wave Tube Amplifiers

"T" Series—CW TWTAs from 1 to 45 GHz, 15 to 2000 watts.

"TP" Series—Pulsed TWTAs from 1 to 18 GHz, 1000 to 10,000 watts.

When it comes to the largest selection of Traveling Wave Tube (TWT) Amplifiers, AR has no equal. We cover a wider range of high-power, broadband amplifiers for your specific test application than any other brand.

CW models also have the capability to faithfully reproduce AM, FM, and pulse modulation input signals. Features that are included at no extra cost are our "Sleep mode" which prolongs the tube life, rugged construction for the rigorous treatment in test labs, modular supplies to reduce repair turn-around, and well thought out digital displays to help you monitor essential amplifier conditions.

So before you choose a look-alike traveling wave tube amplifier, examine all the features and benefits that come along at no extra charge with an AR amplifier. If you want a TWT that will take you farther, you'll choose the one with the AR logo on it ... the company that stands behind our products with the global service and support that you demand.
